Ho Chi Minh - DXC
Technology

Dear Mr. and Mrs.

Through the job advertisement "Recruiting Front-End Intern in Ho Chi Minh - DXC Technology" I found at 123job.vn, I learned that your company is looking for a Front-End Intern. I look forward to trying my best in the dynamic working environment of your company. With the current qualifications and experience and the requirements set forth by your company, I am confident that I can take on this role well at DXC Technology.

As mentioned in the attached profile, I am just a student in school and have not much practical experience at the Company, but with a sense of responsibility, an attitude of always learning along with management experience time, critical thinking, presentation skills, and teamwork skills, and with the knowledge that I have learned at an International organization teaching information technology, I believe I have enough knowledge about Soft skills as well as specialized skills, I am completely confident with the position of an intern at your company.

Thank you for taking your valuable time to review this cover letter. I hope you can arrange a recent face-to-face interview so that I can better present myself and learn more detailed requirements for your Front-End Intern position DXC Technology.

Best regards. Thank you!
